Time Teaching Watches feature 12 colorful, fun designs with coordinating watch bands. Color-coded hands and numbers make the job of learning to tell time much clearer and easier. The red hour hand matches the hour numbers, and the blue minute hand matches the 1 through 60 numbers marked around the outer edge. The watch also features a yellow second hand. The color differentiation makes it easier for children to understand the time concept being taught.

Time Teaching Watches come with a free activity and instruction booklet that kids can use to practice their new skill. Available watch styles include Dinosaurs, Solar System, Classic Fighter Planes, Bonnie the Butterfly, Daisy the Dolphin, Freddie the Fish, Ginger the Giraffe, Lucy the Ladybug, Perky the Panda, Pete the Poison Frog, Tiny the Tree Frog and Tommy the Tiger. All watches have a white background to make them easier to read, metal grommets in the size holes to increase longevity, and a plastic "battery saver" that must be removed before setting the correct time on the watch. Once the "saver" is removed, the Seiko quartz battery has a life of 2 to 3 years. The watches are water-resistant and have comfortable cloth bands.
